

## Making it Easy for Drivers, Too

Your drivers will benefit from TMFS Corporation's system as well. It starts with the application process, which is intuitive and easy to use. It will walk them through everything they need to provide, from previous job history to copies of their license and medical cards. In addition, the application includes items such as drug and alcohol test results, proving they are ready to go to work for you. Once a driver has joined your company, they will get automatic alerts reminding them to update their records or provide additional information.

# All-Inclusive Driver File Management

## NEW APPLICATIONS

You don't see partially completed paperwork. Only new driver applications appear in your Dashboard when they are complete and ready to be viewed, including a copy of a current driver's license and medical card.

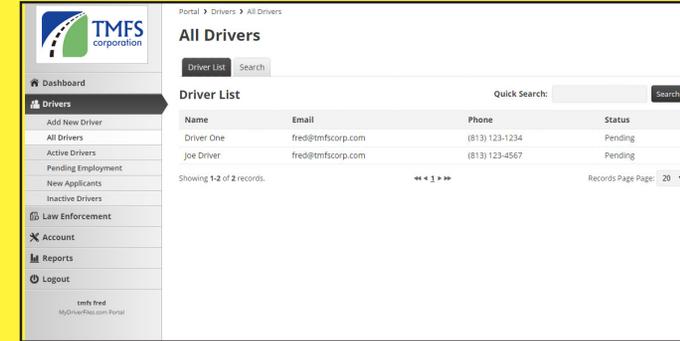

## EXPIRING CREDENTIALS

You will no longer have to dedicate time and resources to checking driver files for expiring credentials. Our system will automatically track every driver in your system, and send alerts — to both you and the driver — when they are about to expire.

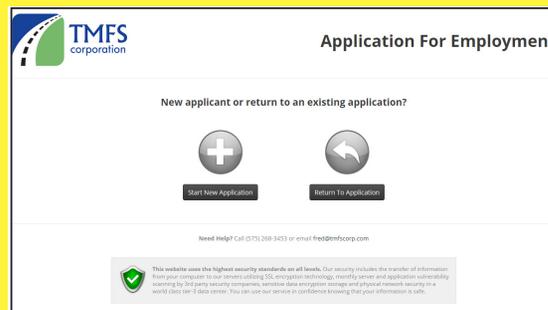

## RECORD REVIEWS

We make it easy to pull random files for regular reviews of your database, to ensure you remain compliant. When Law Enforcement needs to do an audit, you can give them access to only the specific, requested files, keeping the rest of your database secure.

**Can your company afford out-of-date records?** DOT regulations require your files to remain updated at all times, for all drivers. The consequences of not meeting those regulations can cost thousands of dollars.

In addition to driver file maintenance, TMFS is dedicated to providing a single source for all of your documentation needs.

Through our partnerships with third-party vendors, you can run background checks and MVR reports from the system, and the information is automatically linked to that driver's records. In addition, we provide an optional service that allows you to quickly and easily create PSP Driver History files, as well as respond to requests for those histories from other companies.

We have even partnered with companies to provide Drug & Alcohol testing and Trip Sheets, with those programs all seamlessly integrated into your Dashboard.
